Part VII: Appendices

Appendix A: Signed Adoption Resolutions
Appendix B: Glossary
Appendix C: Acronyms
Appendix D: References
Appendix E: Planning Process Documentation
Appendix A: Signed Adoption Resolutions

Appendix A contains copies of the local government resolutions adopting the Dade County Natural Hazard Mitigation Plan. The Plan has been adopted by Lockwood R-I and Everton R-III school districts. Dade County, the municipalities, and the other participating school districts and special districts will adopt the plan upon FEMA approval. The resolutions of adoption from the participating jurisdictions will follow the format in the sample resolutions provided and will be presented in the following order:

- Dade County
- Village of Arcola
- Village of Dadeville
- City of Everton
- City of Greenfield
- City of Lockwood
- Village of South Greenfield
- Schools and Other Special Districts
Sample Local Government Resolution

RESOLUTION NO. __________

A RESOLUTION OF INTENT TO PARTICIPATE IN NATURAL HAZARD MITIGATION AND TO WORK TOWARD BECOMING A SAFER COMMUNITY

WHEREAS, the [Jurisdiction Name] recognizes that no community is immune from natural hazards whether it be tornado/severe thunderstorm, flood, severe winter weather, drought, heat wave, earthquake, dam failure, wildfire or sinkholes and recognizes the importance enhancing its ability to withstand natural hazards as well as the importance of reducing the human suffering, property damage, interruption of public services and economic losses caused by those hazards; and

WHEREAS, the [Jurisdiction Name] may have previously pursued measures such as building modifications, storm water management, or educational instruction and safety drills to minimize the impact of natural hazards; and

WHEREAS, the Federal Emergency Management Agency and the State Emergency Management Agency have developed a natural hazard mitigation program that assists communities in their efforts to become Disaster-Resistant Communities which are sustainable communities after a natural disaster that focus, not just on disaster relief, but also on recovery and reconstruction that brings the community to at least pre-disaster conditions in an accelerated, orderly and preplanned manner; and

WHEREAS, by participating in the Natural Hazard Mitigation program, the [Jurisdiction Name] will be eligible to apply for post-disaster mitigation funds; and

WHEREAS, the [Jurisdiction Name] desires to commit to working with government partners and community partners to implement the Natural Hazard Mitigation Plan; and

WHEREAS, the [Jurisdiction Name] will implement pertinent precepts of the mitigation plan by incorporation into other plans and mechanisms where appropriate; and

WHEREAS, the [Jurisdiction Name] will participate in the evaluation and review of the Plan after a disaster as well as complete a mandated five-year update submitted to the State Emergency Management Agency and the Federal Emergency Management Agency for review and approval; and

NOW, THEREFORE BE IT RESOLVED BY THE [Jurisdiction Name], Missouri AS FOLLOWS:

The [Jurisdiction Name] hereby adopts the Dade County Natural Hazard Mitigation Plan attached hereto for the purpose of building a safer community by reducing natural hazard vulnerability.

ADOPTED this _____ day of _____________, 2013.

RESOLUTION NO. 2013-11A

A RESOLUTION OF INTENT TO PARTICIPATE IN NATURAL HAZARD MITIGATION AND TO WORK TOWARD BECOMING A SAFER COMMUNITY

WHEREAS, the Everton R-III School District recognizes that no community is immune from natural hazards whether it be tornado/severe thunderstorm, flood, severe winter weather, drought, heat wave, earthquake, dam failure, wildfire or sinkholes and recognizes the importance enhancing its ability to withstand natural hazards as well as the importance of reducing the human suffering, property damage, interruption of public services and economic losses caused by those hazards; and

WHEREAS, the Everton R-III School District may have previously pursued measures such as building modifications, storm water management, or educational instruction and safety drills to minimize the impact of natural hazards; and

WHEREAS, the Federal Emergency Management Agency and the State Emergency Management Agency have developed a natural hazard mitigation program that assists communities in their efforts to become Disaster-Resistant Communities which are sustainable communities after a natural disaster that focus, not just on disaster relief, but also on recovery and reconstruction that brings the community to at least pre-disaster conditions in an accelerated, orderly and preplanned manner; and

WHEREAS, by participating in the Natural Hazard Mitigation program, the Everton R-III School District will be eligible to apply for post-disaster mitigation funds; and

WHEREAS, the Everton R-III School District desires to commit to working with government partners and community partners to implement the Natural Hazard Mitigation Plan; and

WHEREAS, the Everton R-III School District will implement pertinent precepts of the mitigation plan by incorporation into other plans and mechanisms where appropriate; and

WHEREAS, the Everton R-III School District will participate in the evaluation and review of the Plan after a disaster as well as complete a mandated five-year update submitted to the State Emergency Management Agency and the Federal Emergency Management Agency for review and approval; and

NOW, THEREFORE BE IT RESOLVED BY THE BOARD OF EDUCATION OF THE EVERTON R-III SCHOOL DISTRICT AS FOLLOWS:

The Everton R-III School District hereby adopts the Dade County Multi-Jurisdictional Natural Hazard Mitigation Plan attached hereto for the purpose of building a safer community by reducing natural hazard vulnerability.

ADOPTED this 18th day of NOVEMBER, 2013.

Tammy Gillaspy, Board President

Attest: Connie Stanford, Board Secretary
Appendix B: Glossary

**Acquisition:** Local governments can acquire lands in high hazard areas through conservation easements, purchase of development rights, or outright purchase of property.

**Acquisition of Hazard-prone structures:** Local governments can acquire lands in high hazard areas through conservation easements, purchase of development rights, or outright purchase of property.

**Asset:** Any manmade or natural feature that has value, including, but not limited to people; buildings; infrastructure like bridges, roads, and sewer and water systems; lifelines like electricity and communication resources; or environmental, cultural, or recreational features like parks, dunes, wetlands, or landmarks.

**Benefit:** Net project outcomes, usually defined in monetary terms. Benefits may include direct and indirect effects. For the purposes of conducting a benefit-cost analysis of proposed mitigation measures, benefits are limited to specific, measurable risk reduction factors, including a reduction in expected property losses (building, contents, and function) and protection of human life.

**Benefit-Cost Analysis (BCA):** A systematic method of comparing the projected benefits to projected costs of a project or policy. It is used as a measure of cost-effectiveness.

**Building:** A structure that is walled and roofed, principally above ground and permanently affixed to a site. The term includes a manufactured home on a permanent foundation on which the wheels and axles carry no weight.

**Capability Assessment:** An assessment that provides a description and analysis of a community or state’s current capacity to address the threats associated with hazards. The capability assessment attempts to identify and evaluate existing policies, regulations, programs, and practices that positively or negatively affect the community or state’s vulnerability to hazards or specific threats.

**Community Emergency Response Team (CERT):** CERT is the mechanism to establish, train, and maintain a local cadre of residents to act as first responders in the event of an emergency. A CERT team is especially critical in the first three days following a disaster when conditions may prevent access by emergency response personnel.

**Community Rating System (CRS):** CRS is a program that provides incentives for National Flood Insurance Program communities to complete activities that reduce flood hazard risk. When the community completes specified activities, the insurance premiums of the policyholders in those communities are reduced.

**Comprehensive Plan:** A document, also known as a “general plan,” covering the entire geographic area of a community and expressing community goals and objectives. The plan lays out the vision, policies, and strategies for the future of the community, including all to the physical elements that will determine the community’s future development. This plan may discuss the community’s desired physical development, desired rate and quantity of growth, community character, transportation service, location
of growth, and siting of public facilities and transportation. In most states, the comprehensive plan has no authority in and of itself, but serves as a guide for community decision-making.

**Cost-effectiveness:** Cost-effectiveness is a key evaluation criterion for federal grant programs. Cost-effectiveness has several possible definitions, although for grant-making purposes FEMA defines a cost-effective project as one whose long-term benefits exceed its cost. That is, a project should prevent more expected damages than it cost initially to fund the effort. This is done to ensure that limited public funds are used in the most efficient manner possible. Benefit-cost analysis is one way to illustrate that a project is cost-effective.

**Critical facilities:** Facilities vital to the health, safety, and welfare of the population and that are especially important following hazard events. Critical facilities include, but are not limited to, shelters, police and fire stations, and hospitals.

**Contour:** A line of equal ground elevation on a topographic (contour) map.

**Debris:** The scattered remains of assets broken or destroyed in a hazard event. Debris caused by a wind or water hazard event can cause additional damage to other assets.

**Disaster Mitigation Act of 2000 (DMA 2000):** DMA 2000 (Public Law 106-390) is the latest legislation to improve the planning process. It was signed into law on October 10, 2000. This legislation reinforces the importance of mitigation planning and emphasizes planning for disasters before they occur.

**Earthquake:** A sudden motion or trembling that is caused by a release of strain accumulated within or along the edge of earth's tectonic plates.

**Elevation of Structures:** Raising structures above the base flood elevation to protect structures located in areas prone to flooding.

**Emergency Response Services:** The actions of first responders such as firefighters, police, and other emergency service personnel at the scene of a hazard event. The first responders take appropriate actions to contain the hazard, protect property, conduct search and rescue operations, provide mass care, and ensure public safety.

**Erosion:** Wearing away of the land surface by detachment and movement of soil and rock fragments, during a flood or storm or over a period of years, through the action of wind, water, or other geologic processes.

**Extent:** The size of an area affected by a hazard or hazard event.

**Fault:** A fracture in the continuity of a rock formation caused by a shifting or dislodging of the earth's crust, in which adjacent surfaces are differentially displaced parallel to the plane of fracture.

**Federal Emergency Management Agency (FEMA):** Independent agency created in 1979 to provide a single point of accountability for all federal activities related to disaster mitigation and emergency preparedness, response, and recovery.

**Flood Depth:** The height of flood water surface above the ground surface.

**Flood Hazard Area:** The area shown to be inundated by a flood of a given magnitude on a map.
**Flood Insurance Rate Map (FIRM):** Map of a community, prepared by FEMA, shows both the special flood hazard areas and the risk premium zones applicable to the community under the National Flood Insurance Program.

**Flood Mitigation Assistance (FMA) Program:** A program created as part of the National Flood Insurance Reform Act of 1994. FMA provides funding to assist communities and states in implementing actions that reduce or eliminate the long-term risk of flood damage to buildings, manufactured homes, and other NFIP insurable structures, with a focus on repetitive loss properties.

**Floodplain:** Any land area, including watercourse, susceptible to partial or complete inundation by water from any source.

**Flood-proofing:** Actions that prevent or minimize future flood damage. Making the areas below the anticipated flood level watertight or intentionally allowing flood-waters to enter the interior to equalize flood pressures are examples of flood-proofing.

**Flood Zone:** A geographical area shown on a FIRM that reflects the severity or type of flooding in the area.

**Goals:** General guidelines that explain what you want to achieve. They are usually broad policy-type statements, long term in nature, and represent global visions.

**Hazard:** A source of potential danger or adverse condition.

**Hazard Event:** A specific occurrence of a particular type of hazard.

**Hazard Identification:** The process of identifying hazards that threaten an area.

**Hazard Mitigation:** Sustained actions taken to reduce or eliminate long-term risk from hazards and their effects.

**Hazard Mitigation Grant Program (HMGP):** Authorized under Section 404 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, HMGP is administrated by FEMA and provides grants to states, tribes, and local governments to implement hazard mitigation actions after a major disaster declaration. The purpose of the program is to reduce the loss of life and property due to disasters and to enable mitigation activities to be implemented as community recovers from a disaster.

**Hazard Profile:** A description of the physical characteristics of hazards and a determination of various descriptions, including magnitude, duration, frequency, probability, and extent. In most cases, a community can most easily use these descriptors when they are recorded and displayed as maps.

**HAZUS (Hazards U.S.):** A GIS-based, nationally standardized, loss estimation tool developed by FEMA.

**Infrastructure:** Refers to the public services of a community that have a direct impact on the quality of life. Infrastructure includes communication technology such as phone lines or Internet access, vital services such as public water supplies and sewer treatment facilities, and includes an area's transportation system such as airports, heliports, highways, bridges, tunnels, roadbeds, overpasses, railways, bridges, rail yards, depots; and waterways, canals, locks, seaports, ferries, harbors, dry docks, piers, and regional dams.
**Landslide:** Downward movement of a slope and materials under the force of gravity.

**Loss Estimation:** Forecast of and economic impacts and property damage from future hazard events, based on current scientific and engineering knowledge.

**Local Emergency Planning Committee (LEPC):** LEPCs consist of community representatives and are appointed by the State Emergency Response Commissions (SERCs), as required by Superfund Amendments and Reauthorization Act (SARA), Title III. They develop an emergency plan to prepare for and respond to chemical emergencies. They are also responsible for coordinating with local facilities to find out what they are doing to reduce hazards, prepare for accidents, and reduce hazardous inventories and releases. The LEPC serves as a focal point in the community for information and discussions about hazardous substances, emergency planning, and health and environmental risks.

**Magnitude:** A measure of the strength of a hazard event. The magnitude (also referred to as severity) of a given hazard event is usually determined using technical measures specific to the hazard.

**Memorandum of Agreement:** A non-binding statement that defines the duties, responsibilities, and commitment of the different parties or individuals; provides a clear statement of values, principles, and goals; and establishes an organizational structure to assist in measuring and evaluating progress.

**Mitigate:** To cause something to become less harsh or hostile, to make less severe or painful.

**Mitigation Actions:** Activities or projects that help achieve the goals and objectives of a mitigation plan.

**Mitigation Plan:** Systematically evaluating community policies, actions, and tools, and setting goals for implementation over the long term that will result in a reduction in risk and minimize future losses community-wide.

**National Flood Insurance Program (NFIP):** Federal program created by Congress in 1968 that makes flood insurance available in communities that enact minimum floodplain management regulations as indicated in 44 CFR §60.3.

**National Weather Service (NWS):** Prepares and issues flood, severe weather, and coastal storm warnings and can provide technical assistance to federal and state entities in preparing weather and flood warning plans.

**Objectives:** Objectives define strategies or implementation steps to attain the identified goals. Unlike goals, objectives are specific and measurable.

**Open Space Preservation:** Preserving undeveloped areas from development through any number of methods, including low-density zoning, easements, or public or private acquisition. Open space preservation is a technique that can be used to prevent flood damage in flood-prone areas, land failures on steep slopes or liquefaction-prone soils, and can enhance that nature and beneficial functions of floodplains.

**Ordinance:** A term for a law or regulation adopted by a local government.
**Planning:** The act or process of making or carrying out plans; the establishment of goals, policies, and procedures for a social or economic unit.

**Policy:** A course of action or specific rule of conduct to be followed in achieving goals and objectives.

**Post-Disaster Mitigation:** An ordinance authorizing certain governmental actions to be taken during the immediate aftermath of a hazard event to expedite implementation of recovery and reconstruction actions identified in a pre-event plan.

**Post-Disaster Recovery Planning:** The purpose of planning those steps the jurisdiction will take to implement long-term reconstruction with a primary goal of mitigating its exposure to future hazards. The post-disaster recovery planning process can also involve coordination with other types of plans and agencies, but it is distinct from planning for emergency operations.

**Preparedness:** Actions that strengthen the capability of government, citizens, and communities to respond to disasters.

**Probability:** A statistical measure of the likelihood that a hazard event will occur.

**Public Education and Outreach Programs:** A campaign to make the public more aware of hazard mitigation programs, including hazard information centers, mailings, public meetings, etc.

**Recovery:** The actions taken by an individual or community after a catastrophic event to restore order and lifelines in a community.

**Regulatory Power:** Local jurisdictions have the authority to regulate certain activities in their jurisdiction. With respect to mitigation planning, the focus is on such things as regulating land use development and construction through zoning, subdivision regulations, design standards, and floodplain regulations.

**Relocation out of Hazard Areas:** A mitigation technique that features the process of demolishing or moving a building to a new location outside the hazard area.

**Resources:** Resources include the people, materials, technologies, money, etc., required to implement strategies or processes. The costs of these resources are often included in a budget.

**Response:** The actions taken during an event to address immediate life and safety needs and to minimize further damage to properties.

**Risk:** The estimated impact that a hazard would have on people, services, facilities, and structures in a community; the likelihood of a hazard event resulting in an adverse condition that causes injury or damage. Risk is often expressed in relative terms such as a high, moderate, or low likelihood of sustaining damage above a particular threshold due to a specific type of hazard event. It also can be expressed in terms of potential monetary losses associated with the intensity of the hazard.

**Scale:** A proportion used in determining a dimensional relationship; the ratio of the distance between two points on a map and the actual distance between the two points on the earth's surface.
**Stafford Act:** The Robert T. Stafford Disaster Relief and Emergency Assistance Act, PL 100-107 was signed into law November 23, 1988 and amended the Disaster Relief Act of 1974, PL 93-288. The Stafford Act is the statutory authority for most federal disaster response activities, especially as they pertain to FEMA and its programs.

**Stakeholder:** Individual or group that will be affected in any way by an action or policy. They include businesses, private organizations, and citizens.

**State Hazard Mitigation Officer (SHMO):** The representative of state government who is the primary point of contact with FEMA, other state and federal agencies, and local units of government in the planning and implementation of pre- and post-disaster mitigation activities.

**Structural Retrofitting:** Modifying existing buildings and infrastructure to protect them from hazards.

**Subdivision:** The division of a tract of land into two or more lots for sale or development.

**Subdivision Regulations:** Subdivision regulations govern the process of converting raw land into building sites. Such regulations provide for the design and layout of building sites or lots and standards for infrastructure, including streets, sidewalks and other pedestrian ways, sanitary sewer, water, other utilities, and storm water runoff management. They can be used to minimize exposure of buildings and infrastructure to hazards. Subdivision regulations also provide for the method of effecting and recording the transfer of land titles (platting process) and the financial responsibility requirements for infrastructure development.

**Substantial Damage:** Damage of any origin sustained by a structure in a Special Flood Hazard Area whereby the cost of restoring the structure to its before-damaged condition would equal or exceed 50 percent of the market value of the structure before the damage.

**Tectonic Plate:** Torsionally rigid, thin segments of the earth's lithosphere that may be assumed to move horizontally and adjoin other plates. It is the friction between plate boundaries that cause seismic activity.

**Topographic:** Characterizes maps that show manmade features and indicate the physical shape of the land using contour lines.

**Tornado:** A violently rotating column of air extending from a thunderstorm to the ground.

**Vulnerability:** Describes how exposed or susceptible to damage an asset is. Vulnerability depends on an asset's construction, contents, and the economic value of its functions. Like indirect damages, the vulnerability of one element of the community is often related to the vulnerability of another. For example, since many businesses depend on uninterrupted electrical power, if an electric substation is flooded it will affect not only the substation itself, but a number of businesses as well. Often, indirect effects can be much more widespread and damaging than direct ones.

**Vulnerability Assessment:** The extent of injury and damage that may result from a hazard event of a given intensity in a given area. The vulnerability assessment should address impacts of hazard events on the existing and future built environment.
Water Systems: Information about drinking water systems in Missouri is maintained by the Missouri Department of Natural Resources. Water systems are classified according to the following definitions established in the Missouri Safe Drinking Water Regulations:

*Community Public Water System.* System serves at least 15 service connections and is operated on a year-round basis or regularly serves at least 25 residents on a year-round basis. These systems include, but are not limited to, cities, water districts, subdivisions, mobile home parks and institutions.

*Transient Noncommunity Public Water System.* A public water system that is not a community water system, which has at least 15 service connections or regularly serves an average of at least 25 individuals daily at least sixty days out of the year. For the most part, the population served changes daily. These systems include, but are not limited to, recreational areas, restaurants, highway rest areas, hotel/motels, and campgrounds.

*Nontransient Noncommunity Public Water System.* A public water system that is not a community water system and that regularly serves at least 25 of the same persons over six months per year. For the most part, the same population returns daily to the facility. These systems include, but are not limited to, factories, large businesses and industries, and schools.

Wildfire: An uncontrolled fire spreading through vegetative fuels, exposing and possibly consuming structures.

Zoning: The division of a political jurisdiction into districts for the purpose of regulating the use of buildings and land, the density of population and development, the height and bulk of buildings and other structures, and the provision of open spaces. A zoning ordinance will include administrative procedures, regulatory controls and requirements, and a zoning district map.

My commission expires _____________________________.

Dade County will hold a public meeting on the development of the Dade County Natural Hazard Mitigation Plan on Wednesday, March 3, 2010, 7:00 p.m., Greenfield High School, Cafeteria, 418 College Street, Greenfield, MO.

Dade County, its incorporated cities, school districts, and other local jurisdictions are working together to prepare the Dade County Natural Hazard Mitigation Plan. The Plan provides strategies developed to reduce the vulnerability of people and property in the county from the impacts of natural hazard events and enables the participating jurisdictions to be eligible for mitigation funding programs from the Federal Emergency Management Agency (FEMA).

The Plan addresses hazards such as flooding, tornadoes, severe winter weather, drought, the vulnerability of Dade County jurisdictions to these hazards and likely impacts. The Plan also sets goals, objectives and a proposed five-year matrix of strategic actions to reduce the impacts of future natural disasters on people and property in Dade County.

All interested persons are invited to attend this meeting and provide input on this Plan which must be approved by the Dade County Commission, the governing body of each participating jurisdiction, the State Emergency Management Agency, and FEMA.

For questions contact: Diane May, 417-836-6500 or Diane
May@missouristate.edu

To be published in The Vedette February 25, 2010.

Chuck and Matt,
Our next meeting to work on the Dade County Mitigation Plan will be on Monday, November 16 at 10:00 am in the Lockwood H.S. Library. If you will be able to make it please let Bill Rogers know as he is ordering food so we can make it a working lunch. I am mailing you Sections 2, 3 & 4. If you have time and can look them over for corrections and additions it would be helpful.
Thanks,
Cheryl

Currently we have for our Dade County Mitigation meeting on Monday.
Larry Wheeler representing Arcola
Jim Toer representing Dadeville
Don Wilson representing Everton
Pam Allen representing the Health Department
Bob Kittsmiller - Emergency Management
George Wynes - Greenfield
Chuck Adams - Everton School
Cheryl Mack Greenwood School
I will let you know if I hear from anyone else.
Thanks for having us at Lockwood.
Cheryl
Dade County Natural Hazard Mitigation Plan
Notice of Public Meeting

Dade County will hold a public meeting on the development of the Dade County Natural Hazard Mitigation Plan on Wednesday, March 3, 2010, 7:00 p.m., Greenfield High School, Cafeteria, 418 College Street, Greenfield, MO.

Dade County, its incorporated cities, school districts, and other local jurisdictions are working together to prepare the Dade County Natural Hazard Mitigation Plan. The Plan provides strategies developed to reduce the vulnerability of people and property in the county from the impacts of natural hazard events and enables the participating jurisdictions to be eligible for mitigation funding programs from the Federal Emergency Management Agency (FEMA).

The Plan addresses hazards such as flooding, tornadoes, severe winter weather, drought, the vulnerability of Dade County jurisdictions to these hazards and likely impacts. The Plan also sets goals, objectives and a proposed five-year matrix of strategic actions to reduce the impacts of future natural disasters on people and property in Dade County.

All interested persons are invited to attend this meeting and provide input on this Plan which must be approved by the Dade County Commission, the governing body of each participating jurisdiction, the State Emergency Management Agency, and FEMA.

For questions contact: Diane May, 417-836-6900 or DianeMay@missouristate.edu.

Notice posted on SMCOG website: http://smcog.missouristate.edu/hazardMitigation.html
Notice of Meeting
Dade County LEPC Planning and Natural Hazard Mitigation Planning Meeting

Dade County will hold a Local Emergency Planning Committee meeting and Natural Hazard Mitigation Plan development meeting on Tuesday, March 23, 2010, 6:30 p.m. at Mom’s Kountry Kitchen, 3 North Allison Avenue, Greenfield, MO.

The LEPC Planning meeting will focus on a review of the 2007 Ice Storm, Local Situation Response, and Assessment. Following this review and discussion, the development status of the Dade County Natural Hazard Mitigation Plan will be presented. Dade County, its incorporated cities, school districts, and other local jurisdictions are working together to prepare the Dade County Natural Hazard Mitigation Plan. The Plan provides strategies developed to reduce the vulnerability of people and property in the county from the impacts of natural hazard events and enables the participating jurisdictions to be eligible for mitigation funding programs from the Federal Emergency Management Agency (FEMA). The discussion will include a review of draft elements of the plan, including proposed goals, objectives and strategic actions to reduce the impact of future natural hazards in Dade County.

All interested persons are invited to attend this meeting and input from the public on the Natural Hazard Mitigation Plan is welcomed and encouraged. The discussion on the Hazard Mitigation Plan will start at approximately 7:15 p.m.

For questions on the LEPC agenda, contact: Bob Kitsmiller, 417-424-3239. For questions or further information on the Natural Hazard Mitigation Plan, contact: Diane May, 417-836-6900 or DianeMay@missouristate.edu.

Attachments: Dade NHMP Mtg Notice 4-26-12.pdf

To: Dade County Natural Hazard Mitigation Plan Participants,

As you know, completion of the Dade County Natural Hazard Mitigation Plan was on hold while revisions have been made that will meet FEMA’s review guidelines. SMCOG staff have been working on the revisions and need your participation to complete the final elements and move the Plan forward for public hearing as quickly as possible.

A Plan Advisory Committee meeting is scheduled for:

Thursday, April 26, 2012
6:30 p.m.
Dade County Emergency Operations Center
108 S. Main
Greenfield, MO

Topics to be discussed at the meeting will include:
- Status of the Plan preparation and completion timeline
- Community Profile review
- Risk Assessment and Vulnerability Analysis review
- Mitigation Goals, Objectives and Actions

The attached meeting notice is posted on our website at [http://smcog.missouristate.edu](http://smcog.missouristate.edu). Copies of these sections of the Plan will be available at the meeting. If you will not be able to attend the meeting or send another representative from your jurisdiction or organization, please send me an email message or call me at either my office or mobile number listed below.

Dade County Multi-Jurisdictional Natural Hazard Mitigation Plan

Notice of Public Meeting

A plan advisory committee meeting for the Dade County Multi-Jurisdictional Natural Hazard Mitigation Plan Update will be held on:

Thursday, April 26, 2012
6:30 p.m.
Dade County Emergency Operations Center
108 S. Main
Greenfield, MO.

Dade County, its incorporated cities, school districts, and other special districts and interested parties are working together to develop the Dade County Natural Hazard Mitigation Plan. The Plan examines hazards including tornadoes and severe thunderstorm, floods, extreme winter weather, heat wave, drought, earthquake, dam failure, wildfire, and sinkholes. The Plan addresses the vulnerability of Dade County jurisdictions to these hazards and likely impacts. The Plan also addresses current capabilities of the participating jurisdictions and mitigation goals, objectives and strategic actions over the next five years to reduce the impacts of future natural disasters on people and property in Dade County.

Topics to be discussed at the meeting will include:
- Status of the Plan preparation and completion timeline
- Community Profile review
- Risk Assessment and Vulnerability Analysis review
- Mitigation Goals, Objectives and Actions

This meeting is open to the public. All interested persons are invited and encouraged to attend and participate in the Plan development and review process. For further information, contact Diane May, Southwest Missouri Council of Governments. (417) 836-6973 or DianeMay@MissouriState.edu

Subject: Dade County Hazard Mitigation Plan Open House & Mtg

Importance: High

Dade County Plan Advisory Committee, Partners and Interested Persons,

We are in the final stages of completing the Dade County Natural Hazard Mitigation Plan for submission to SEMA and FEMA for review and approval. A Public Open House on the Plan is scheduled for the general public and any interested person to review and make comment.

Dade County Natural Hazard Mitigation Plan
Public Open House
Monday, November 18th
2:30 p.m. - 4:30 p.m.
Dade County Emergency Operations Center
108 S. Main, Greenfield

The Open House will be followed by a Plan Advisory Committee Meeting at 4:30 pm, at the Emergency Operations Center, for the participating local governments, school districts and fire districts to consider any public comments and/or final changes or corrections to the draft plan.

We’ve run into a few unanticipated glitches this week and were not able to post the final draft chapters on our website. They will be posted tomorrow and I will send another email to you when the posting is completed.

We will have some display size maps, paper copy of the plan, and summary handouts for the public. These will also be available at the Planning Committee meeting. I will also be bringing out copies of selected sections from the Plan so that you can note any corrections or changes needed specifically for your jurisdiction.

If you are able to attend the Plan Advisory Committee meeting, you do not need to also attend the Public Open House. Of course everyone is welcome! The Open House is a come and go event for interested persons.

The final draft plan will be submitted to SEMA before the end of next week.

Attached is a copy of the public open house notice and agenda for the Plan Advisory Committee meeting. Please feel free to contact me if you have any questions. Bob Kitsmiller has been in contact with many of the participating jurisdictions, so you can call him as well if you can’t reach me. Thanks!

Diane May, AICP
Executive Director
Southwest Missouri Council of Governments
Missouri State University
2013 Dade County Natural Hazard Mitigation Plan
Notice of Public Open House
And
Plan Advisory Committee Meeting

Dade County, its incorporated communities, school districts, and other special
districts have been working together to develop the Dade County Natural Hazard
Mitigation Plan.

A public open house on the draft 2013 Dade County Natural Hazard Mitigation
Plan will be held on:

Monday, November 18, 2013
2:30 p.m. – 4:30 p.m.
Dade County Emergency Operations Center
108 S. Main
Greenfield, MO

The Plan provides an overview of the existing characteristics and conditions of the
Dade County community, assesses hazard risks and vulnerabilities, summarizes
current capabilities, and identifies strategies and actions that can be undertaken to
reduce the vulnerability of people and property in Dade County from the impacts
of natural hazard events. Upon FEMA’s approval of the Plan and adoption by the
participating jurisdictions, the jurisdictions will be eligible to apply for mitigation
funding programs available through FEMA.

The Open House provides opportunity for the public to view display materials of
key components of the Plan and to comment on the Plan.

The Open House will be followed by a Plan Advisory Committee meeting, 4:30
p.m., at the Dade County Emergency Operations Center.

Interested persons are welcome to attend at any time during the Open House and
are also welcome to attend and make comment on the Plan at the Plan Advisory
Meeting. Interested persons may also review and comment on the Plan on-line at
http://smcog.missouristate.edu. For more information, contact Diane May,
Southwest Missouri Council of Governments, 417-836-6973 or at
DianeMay@missouristate.edu.
